Patient Experience : I'm lucky , I'm walking again

Maqsood ur Rehman, 63 years age from Haripur

I am diabetic since last 10 -12 years there are not many good hospitals in Haripur, if there are, they are expensive and unreliable when it comes to getting consultation and treatment.

I had foot infection and for foot infection I have visited so many hospitals near Haripur as well as in Rawalpindi/Islamabad but to no relief, Some Doctors told me that they had to cut my leg to stop the infection from spreading in the body.

So, one day I went to offer my prayers on Friday , there I met a guy who told me about “The Diabetes Centre”, he told me that this Hospital provides treatment for only sugar related disease and complications under a roof . He is also a satisfied patient of The Diabetes Centre . So, I decided to try my luck, I was amazed to see such a cooperative staff and state of the art treatment.

I got the treatment from Foot Care clinic of TDC. I had lost hope that would ever walk again properly but Dr. Lodhi provided me hope and he said INSHALLAH my foot infection will be recovered , just like he said I was treated from Foot infection and ALHUMDULILLAH now I am walking again.

I am very much thankful to Dr.Lodhi for providing such a wonderful treatment and gave hope to my life

Thank You Diabetes Centre
